

# Welcome to E3 Selector

An application intended to help you select E3 courses more easily.

The process consists of just three simple steps:

1

We'll first ask you for some information enabling us to get rid of all the courses that are not relevant to you.

2

You can then browse thorough the courses matching your criteria, filter them and select those seeming most interesting to you.

3

Finally, you can inspect your selected courses further and jump to their lsf page to apply for participation.
